Summary of Qualifications

I describe myself like person with good communication skills. I am interested in new technologies (especially Front-end developing). Quickly find a common language with people. Love to work in team and teach new thing from other people. Like to look for non-standard ways for solving different task. While study in SoftServe ITA has got powerful experience in building web-applications when working in team by SCRUM methodology. Currently, looking for a place when I can apply my knowledge, become part of a cool team, program and develop both personally and with team.

Skills

Programming
